Game Rules

Connect Multiply · the five-in-a-row multiplication game

CONNECT MULTIPLY

Connect Multiply is a "five-in-a-row" game using multiplication. Players multiply number cards (1–12) from their hand to match a product on the board, placing a chip.

A fun, competitive math game for practicing multiplication and factoring.

2–4 Players | **7+** Ages | **1–12** Times tables

Components

Game Board
1 board

Number Cards 1–12
5 sets = 60 cards

Special Ability Cards
20 cards

Player Chips
20 in 4 colours

Gem Tokens
14 gems

1 Setup

1. Place the game board in the center.
2. Each player chooses a color and takes all 20 chips of that color.
3. Shuffle all cards (Number and Special) together to form one deck.
4. Deal 5 cards to each player.
5. Place the remaining cards facedown as the draw pile.
6. Place the Gem Tokens where all players can reach them.

2 How to Play

1. The player who last solved a math problem goes first.
2. On your turn, choose one of the following actions:

Play Cards
Multiply 2 or more cards from your hand. Place one of your chips on the matching value on the board. Discard the cards you used.

OR

Discard
Discard 1 to 5 cards from your hand.

Example: cards 3 and 4 → 3 × 4 = 12, put your chip on 12

- **Special Cards:** You may also play one Special Ability card on your turn.
- **Gems:** If you place a chip on a space with a Gem symbol, take 1 Gem Token from the supply.
- **FREE space:** If one of your chips is next to it, it counts as one of your spaces.
- **End Turn:** Draw cards from the draw pile until you have 5 cards in hand.

3 Goal

The first player to connect 5 chips in a row (vertically, horizontally, or diagonally) OR collect 5 Gem Tokens wins the game.

Game Rules

Connect Multiply · the five-in-a-row multiplication game

CONNECT MULTIPLY

4 Card Abilities

Number Card (1–12)

Use its number value for multiplication.

Any number 1–12

Use this card as a "wild card" for any number (1–12) to help create a product.

Kick off!!

Remove 1 chip (belonging to any other player) from the board. If the chip selected to be removed has a diamond on it, the player who owns that chip must return 1 diamond to the central supply.

Swap Cards

Swap your entire hand of cards with another player. That player then draws 1 card (to have 5 cards for their next turn).

Clean your hand

Choose one player. That player must discard their entire hand and draw 5 new cards.

5 Additional Play Modes

Family / Junior Mode : May add special rules to reduce the skill gap, such as:

- Adults must use 3 or more cards for multiplication, but children can use only 2.
- Children draw 6 cards; adults draw 5 cards.
- Children start the game with one "Any number" card.
- Adjusted Victory Conditions, such as — Adults: 5 chips in a row OR 7 gems · Children (7–10 yrs): 4 chips in a row OR 5 gems.
- Allow the simultaneous use of addition, subtraction, multiplication, and division, in the style of creating an equation to match a number on the board.
- Adjusted Special Card Abilities (Example):
  - **"Clean Your Hand":** Choose 1 player; they discard 2 cards (randomly or chosen) and draw 2 new cards.
  - **"Swap Cards":** Choose 1 player; swap 1 card with them (randomly).

Expert Mode (For Skilled Players) : May remove some special cards to make the game focus more on multiplication strategy.
